## Features

**Two world class concert grands in one digital piano.**

Two world class pianos are contained within the CVP Clavinova. The CFX, Yamaha's finest concert grand, selected and played by the winner of the 2010 International Chopin Piano Competition, and the Imperial from Bösendorfer, one of the oldest piano manufacturers in the world and a brand held in high esteem by pianists throughout its long history. These renowned pianos are characterized by distinctive traits such as power, versatility, subtlety, lightness and mellowness.

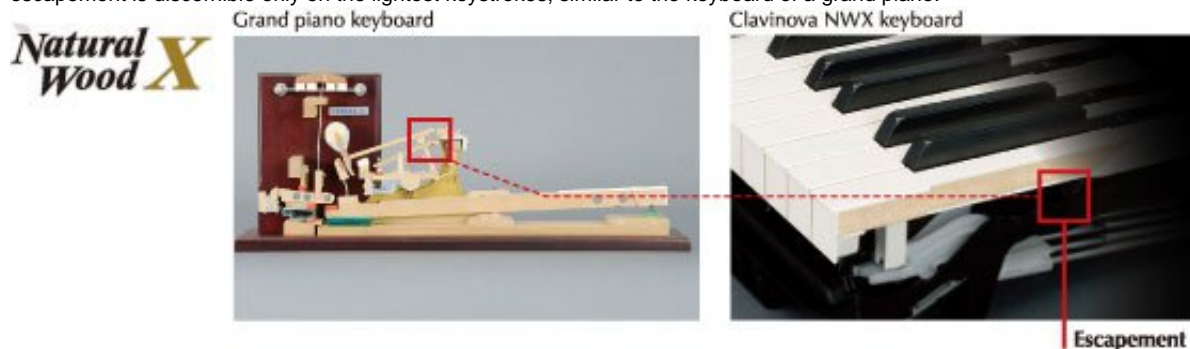

Both of these superb pianos' Voices are featured by name in the Clavinova. Tuned to perfection by a highly experienced piano technician and having the sound from each key recorded individually, Clavinova truly captures the unique tonal character of each of these outstanding instruments.

With Clavinova, you can choose from and enjoy the amazing digital reproductions of the exquisite beauty tone that only the Yamaha CFX and Bösendorfer Imperial can deliver.

## Überragende Spielbarkeit und Spielgefühl

NWX (Natural Wood X) keyboards are created using Yamaha's unrivaled expertise acquired through more than a century of crafting fine acoustic pianos. The material used for NWX keyboards is cut from wood that has been carefully dried specifically for use in making musical instruments. Only the best wood from the finest part of the tree is selected, resulting in a keyboard that is more resistant to buckling and warping than common laminated wood keyboards.

The NWX keyboard also features an escapement mechanism that reproduces the feel of an acoustic piano as it goes through the let-off and drop of the hammer when a key is played very softly. The action has been designed in such a way that the escapement is discernible only on the lightest keystrokes, similar to the keyboard of a grand piano.

Sie reproduzieren die angenehme Oberfläche von Elfenbeintasten, wie sie einst bei edelsten Klavieren Verwendung fanden. Das hoch absorptionsfähige Material behält seine optimale Oberfläche und seinen angenehmen Griff auch nach stundenlanger Performance und sorgt so dafür, dass Ihre Finger nicht abrutschen. Zusätzlich zu dem sanften, luxuriösen Spielgefühl ist synthetisches Elfenbein pflegeleicht und muss lediglich mit einem weichen Tuch gereinigt werden.

**For a sound that truly resonates with the listener.**

---

In a grand piano, strings and sounds resonate throughout the entire body of the instrument producing a rich reverberation that envelops the listener in sound. Not only are the strings you are playing vibrating, but other strings ring as a reaction to ones you play. This is one reason the piano's sound is so complex and rich.  
B. in welcher Oktave wie viele Tasten angeschlagen werden, mit wie viel Kraft gespielt und wann das Pedal eingesetzt wird.

## Ein neues Kopfhörer Erlebnis

Unique to Yamaha, the Stereophonic Optimizer adjusts the spacing of the sound and the separation from the piano when listening via the headphones, resulting in a spacious sound image that will inspire you to play for hours at a time. Using this private listening environment, the sound of the Clavinova appears to come from the body of the instrument rather than from the headphones, providing a more realistic and naturally comfortable experience.

## The Clavinova is ready for your Session.

The Piano Room features the world-class Yamaha CFX and Bösendorfer

---

Imperial concert grand pianos and has been expanded to include additional keyboard instruments including vintage electric pianos. In Session Mode, you can invite three additional session musicians into the room to accompany you as you practice and perform in 40 different musical styles. These session musicians will automatically follow your harmonies in either full-keyboard mode or split mode, and will also follow your volume expression using Dynamics Control. These session musicians can selectively be activated and deactivated depending upon your musical needs at the time. Within this special room you can even record your sessions with the touch of one button.

### **So realistic, you won't believe the sound is coming from a keyboard.**

Das CVP-705 besitzt hunderte von hochwertigen Instrumentenklängen, darunter die ""Natural!"" , ""Sweet!"" und ""Cool!""-Voices, die individuell gesampelt wurden, um ihre akustischen Vorbilder so originalgetreu wie möglich abzubilden. Yamahas Super Articulation Voices bereichern Ihr Spiel mit authentischen Klangcharakteristika akustischer Musikinstrumente, die sich anhören, als würden sie gerade von einem echten Instrumentalisten erzeugt und nicht von einer Pianotastatur. Dazu gehören „Griffbrettgeräusche“, das „Klopfen“ gegen den Gitarrenkorpus oder auch „Atemgeräusche“ und Glissandi von Blasinstrumenten. Indem Sie einfach Ihren Anschlag und Ihre Spieltechniken variieren oder die Pedale einsetzen, verleihen die Super Articulation Voices Ihrem Pianospiele noch mehr Authentizität.

### **All you need to know is the song. The Clavinova does the rest.**

Music Finder is great when you are looking for just the right Style or Voice combinations so YOU can perform a particular song. Simply choose the name of the song you want to play from the Music Finder list and the CVP will call up the proper settings so you can get playing right away. These settings were created by professional musicians from around the world specializing in particular genres of music.

### **Can't remember the name of a song? No problem. Just play!**

The Style Recommender is an intelligent function that allows you to find a Style that suits the type of music you feel like playing. You don't even need to know the name of the song; the rhythmic feel alone will do. Just play a bar or two of a simple rhythm or piano tune and a list of Styles that match your playing will instantly be displayed.

### **An automatic page turner with Guide Lamps to light the way.**

Follow along with the bouncing ball shown on the score as you play to be sure of never losing your place. Pages turn automatically or you can flip through pages by swiping the screen horizontally. If reading music isn't your forte, you can follow the guide lamps above the keyboard that will show you the correct keys. With guide activated, CVP will wait until you play the correct note so you can practice at your own pace.

### **Sing in perfect Harmony... with yourself!**

You can enjoy karaoke backing with songs stored in your Clavinova or downloaded from YamahaMusicsoft.com. The lyrics are shown on the display\* and the words change color as the song advances, so you know exactly when to come in. You can even display the lyrics on a big TV screen so everyone can join in!

### **Get in touch with the features you use most.**

This easy-to-understand touch screen makes the CVP simple to operate: you can touch, slide, swipe or rotate contents in the screen to access different functions and make adjustments. Adjustable brightness ensures an easy-to-read screen in all situations. Other buttons on the panel are laid out in easy-to-see and reach locations.

**If you want it to, the Clavinova will even talk to you!**

When Voice Guide is active, the Clavinova speaks information from the current display or operation being executed. This allows those who have visual impairments to enjoy playing and using the instrument.

Note:

\*When using Voice Guide, make sure that the USB flash memory containing the Voice Guide files is connected to the instrument.

\*The audible information of the functions/screen supported by the Voice Guide is limited.

**"Intelligent Acoustic Control" erzeugt ausgewogenen Klang: Kräftige Bässen und klare Höhen, auch bei kleinen Lautstärken.**

You decide what functions appear on the touch screen and which are assigned to special panel buttons.

- Bookmarks for your favorite Voices and Styles in one convenient button

- Shortcuts on the Home display for your most used "apps" from the MENU display
- Assign your most used functions to the ASSIGNABLE buttons on the panel.

## Turn a USB device into an portable recording studio.

The USB Audio Recorder\* allows you to record your performances on a USB flash drive for emailing, uploading to the internet or sending to your MP3 player. This lets you compare two different performances to gauge your progress or allows you to share your music with friends and family.

\*Stored as WAV or 5 different popular MP3 formats.

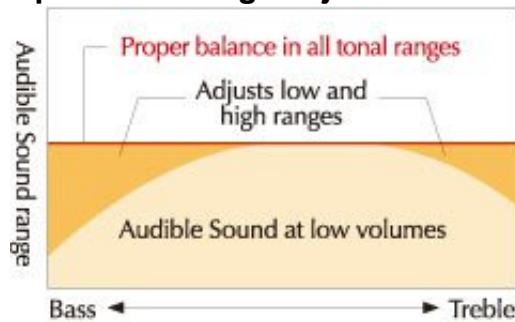

[Other Functions]

- Pitch Shift: Change the key without changing the tempo

Verlangsamen oder Beschleunigen Sie das Tempo, ohne dabei die Tonhöhe zu ändern.

Blenden Sie Gesangspassagen oder Soli aus Audiodaten aus und singen oder spielen Sie selber.

## Optimaler Klang bei jeder Lautstärke

When playing in a home environment, people often enjoy the Clavinova at much less than full volume. However, the physics of sound at low volumes results in a loss of treble and bass. On a Clavinova, however, the Intelligent Acoustic Control (IAC) automatically adjusts the sound so you enjoy proper excellent bass and treble sound balance even at low volumes. Additionally, the volume dial automatically makes fine adjustments to the overall sound of the speaker system (EQ) at low volume. This ability to adjust volume without losing the rich and balanced sound is an exclusive Yamaha benefit, ensuring you always play with the utmost sound quality.

## Wireless audio and wireless MIDI with iOS devices.

If you use an iPad, iPhone or iPod touch, Yamaha apps will make playing

more convenient and enjoyable. Quickly set the ideal Voice and accompaniment Style for the song you'd like to play. Record your own performance and share it with a friend. Add to visual effects to your performance with computer animation that responds to what you play. Check out the apps and find the ones that meet your needs. Several Yamaha apps are designed to work only with Clavinova digital pianos.

Note: Some apps require a connection to your instrument. Wired connections are possible with devices such as the Yamaha i-MX1, i-UX1 or Apple Lightning to USB Camera Adapter. Wireless connection may require a wireless router. Wireless audio connection requires bundled USB wireless LAN device.

## Teach your iPad to play by ear.

With this exciting Yamaha app, your iOS devices will listen to recordings of virtually any song\* and tell you the chords required for playing it. Bring the song file into the CVP where guide lamps can show you how to play those chords, and also teach your virtual backing band to play along with you using Styles. Yamaha's exclusive Chord Tracker app is optimized to work with CVP Clavinovas for unlimited self-taught musical possibilities.

\*Recordings must be in MP3 or WAV formats on your iOS device.

For more information, please refer to Chord Tracker
